

OSBORNE REFRIGERATORS

Double Sided Impulse Chiller

Designed AND manufactured exclusively in the UK

The new *eCold* range from Osborne Refrigerators is designed to be good to your pocket as well as the environment. Low-voltage fans and LED lighting put very little waste heat into the cabinet and improved insulation and efficient compressors maximise cooling performance while using less energy. *eCold* cabinets are also designed to be virtually maintenance-free, with no fluorescent tubes to change, and condensers that never require unblocking.

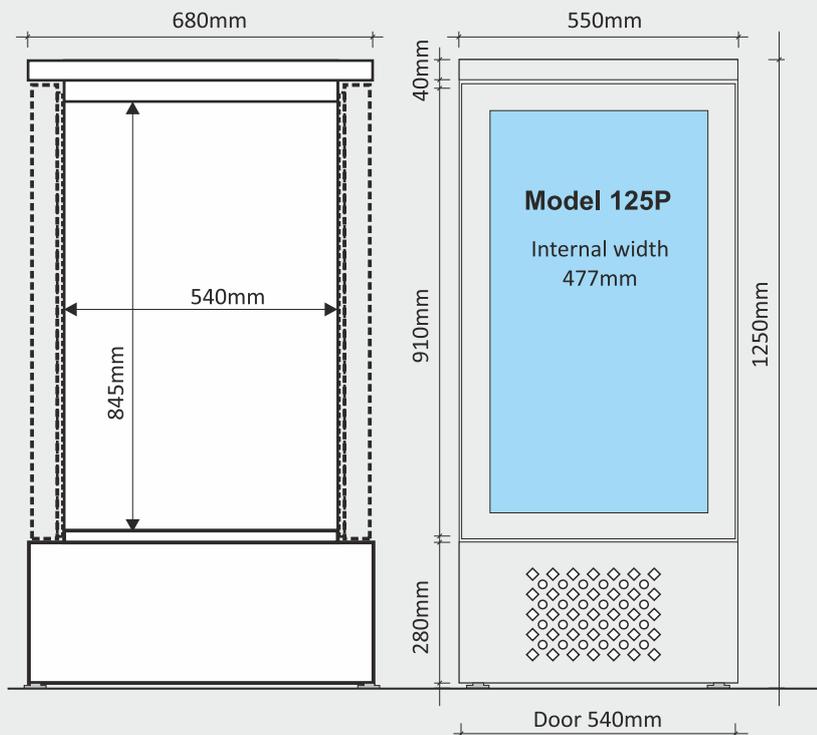

Osborne Refrigerators Ltd have been established at our West Sussex base for more than 50 years and we are the leading British manufacturer of refrigerators designed for the chilling and storage of wine and cold beverages. All our chillers are also suitable for storing foodstuffs. As well as our standard range of cabinets, which are specified by leading breweries, drinks manufacturers and leisure companies across the world, we also produce a range of high quality cabinets designed specifically for the refrigeration of milk for coffee machines.

All our refrigerators use CFC free polystyrene insulation and can be efficiently recycled at the end of their life. They are also available with a choice of refrigerants.

The Osborne range is always evolving, due to our commitment to constantly improve our products and also in response to specific customer requirements. We have built an enviable reputation for the quality and reliability of our refrigerators and we will never stop working to maintain that reputation.

Details

The 125P is a new retail-friendly chiller concept. The double sided design allows it to be placed within shelving runs in queuing areas for the perfect opportunity to create impulse purchasing of soft drinks. It is also suitable for the display of foodstuffs such as fresh sandwiches. It is manufactured from rust resistant zinc-coated steel with a hard wearing powder-coat finish or from brushed stainless steel. The interior is beaten aluminium or stainless steel. Designed to our *eCold* specification, the cabinet features low-energy LED lighting and 12V maglev fans. The insulation is environmentally friendly polystyrene and the refrigerant is hydrocarbon (R600a). The digital temperature controller is hidden to prevent unauthorised "adjustments" by customers. The standard painted finish is silver but cabinets can also be supplied in our normal black or a wide variety of RAL / Pantone colours (minimum order quantities may apply).

Features

- Fan assisted evaporators for rapid cooling
- Fan assisted condensers for efficient running
- Automatic defrost and re-evaporation
- LED lighting & low voltage fans
- Digital temperature controller
- Double glazed doors front & rear

Options

- Solid lockable doors to front and/or rear
- Choice of colours
- Stainless steel exterior and/or interior
- Stainless steel doors (frame/solid)
- Top mounted lightbox for branding (adds 180mm to height)
- 60Hz electrics
- R134a refrigerant

<u>Size</u>	<u>125P</u>
Height (mm)	1250
Width (mm)	550
Depth (mm)	680
<u>Capacities</u>	
Bottles (500ml)	135
Nett Capacity (ltr)	215
Gross Weight Packed (kg)	79
<u>Technical Info</u>	
Voltage (V)	220-240
Frequency (Hz)	50
Rated Power (W)	110
Refrigerant Type	R600a
Refrigerant Charge (g)	59
Product Temperature Range (°C)	3-6
Insulation Type	Polystyrene, CFC Free
