

OSBORNE REFRIGERATORS

Double Sided Upright Chiller

Designed AND manufactured exclusively in the UK

The new *eCold* range from Osborne Refrigerators is designed to be good to your pocket as well as the environment. Low-voltage fans and LED lighting put very little waste heat into the cabinet and improved insulation and efficient compressors maximise cooling performance while using less energy. *eCold* cabinets are also designed to be virtually maintenance-free, with no fluorescent tubes to change, and condensers that never require unblocking.

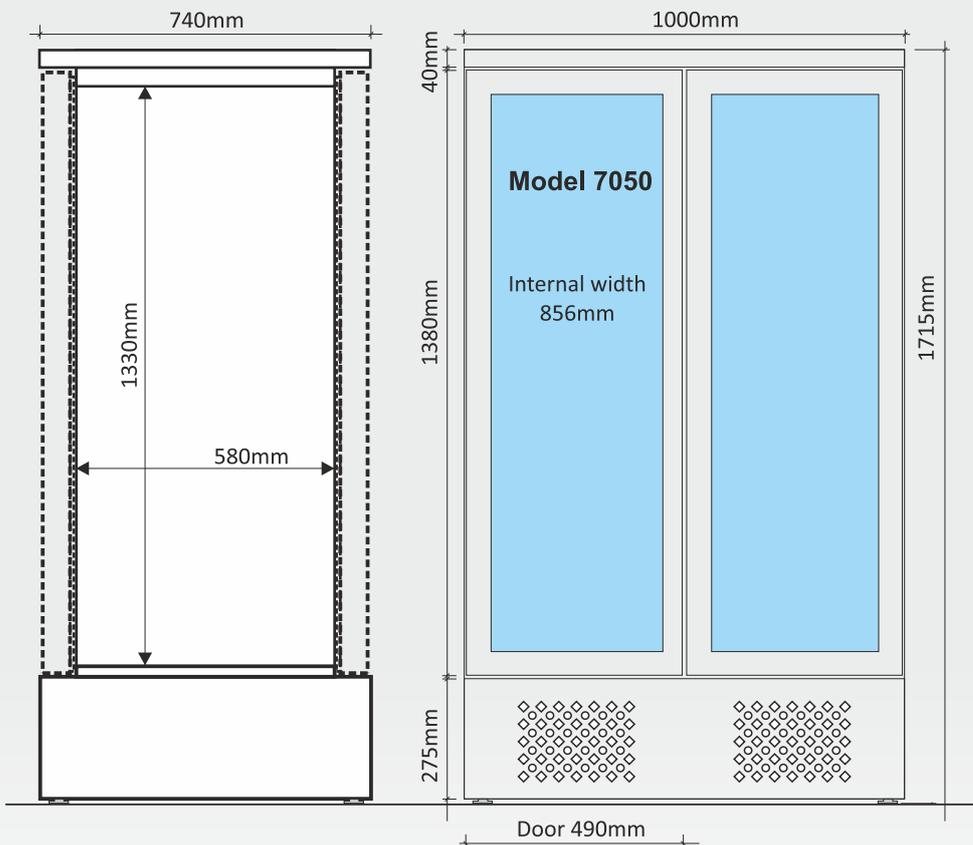

Osborne Refrigerators Ltd have been established at our West Sussex base for more than 50 years and we are the leading British manufacturer of refrigerators designed for the chilling and storage of wine and cold beverages. All our chillers are also suitable for storing foodstuffs. As well as our standard range of cabinets, which are specified by leading breweries, drinks manufacturers and leisure companies across the world, we also produce a range of high quality cabinets designed specifically for the refrigeration of milk for coffee machines.

All our refrigerators use CFC free polystyrene insulation and can be efficiently recycled at the end of their life. They are also available with a choice of refrigerants.

The Osborne range is always evolving, due to our commitment to constantly improve our products and also in response to specific customer requirements. We have built an enviable reputation for the quality and reliability of our refrigerators and we will never stop working to maintain that reputation.

Details

The 7050 is an upright pass-through cabinet, which can be used either as a double sided display for use in island bars or with solid rear doors for backfilling. Designed primarily for the storage and display of bottled beverages, this cabinet is also suitable for foodstuffs. It is manufactured from rust resistant zinc-coated steel with a hard wearing powder-coat finish or brushed stainless steel, the interior is beaten aluminium or stainless steel. The interior is fan assisted for enhanced chilling and the condenser is fan assisted for greater efficiency. The insulation is environmentally friendly polystyrene and a choice of refrigerants is available. The cabinet can be built in leaving only the front clear, or put into the side of a storeroom / coldroom for backfilling with ready chilled stock. The doors are double glazed and lockable or solid lockable doors are available as an option. Standard painted finishes are black, brown or silver but cabinets can be supplied in a wide variety of RAL and Pantone colours (minimum order quantities apply).

Features

Twin refrigeration system for greater cooling capacity
 Fan assisted evaporators for rapid cooling
 Fan assisted condensers for efficient running
 Automatic defrost and re-evaporation
 LED lighting & low voltage fans
 Digital temperature controller
 Double glazed lockable doors front & rear

Options

Solid lockable doors to front and/or rear
 Choice of colours
 Stainless steel exterior and/or interior
 Stainless steel doors (frame/solid)
 Top mounted lightbox for branding (adds 180mm to height)
 60Hz electrics
 R134a refrigerant

Size

Height (mm)	1740
Width (mm)	1000
Depth (mm)	740

Capacities

Bottles (330ml/236mm high)	682
Nett Capacity (ltr)	720
Gross Weight Packed (kg)	120

Technical Info

Voltage (V)	220-240
Frequency (Hz)	50
Rated Power (W)	300 (x2)
Refrigerant Type	R600a
Refrigerant Charge (g)	125 (x2)
Product Temperature Range (°C)	1-5
Insulation Type	Polystyrene, CFC Free
