

OSBORNE REFRIGERATORS

Fresh Fish Cabinets

Designed AND manufactured
exclusively in the UK

Osborne Refrigerators cabinets are designed to be good for your pocket as well as the environment. Low-voltage fans and LED lighting put very little waste heat into the cabinet and improved insulation and efficient compressors maximise cooling performance while using less energy. *eCold* cabinets are also designed to be virtually maintenance-free wherever possible, with no fluorescent tubes to change, and condensers that either never require unblocking or have easy to clean filters.

Osborne Refrigerators Ltd have been established at our West Sussex base for 60 years and we are the leading British manufacturer of refrigerators designed for the chilling and storage of wine and cold beverages. As well as our traditional range of cabinets, which are specified by leading breweries, drinks manufacturers and leisure companies across the world, we also produce a range of high quality cabinets ideal for use in retail environments.

All our refrigerators use CFC free polystyrene insulation and can be efficiently recycled at the end of their life. They are also available with a choice of refrigerants.

The Osborne range is always evolving, due to our commitment to constantly improve our products and also in response to specific customer requirements. We have built an enviable reputation for the quality and reliability of our refrigerators and we will never stop working to maintain that reputation.

Models OC80, OC150 and OC250 are specialist chilled cabinets designed for the storage of fresh fish in perfect conditions. Unlike many "fish cabinets" which are merely standard fan-assisted models running at a slightly lower temperature, our fish cabinets feature a fan-less cold wall refrigeration system. This helps to maintain optimum humidity and prevents the fish from drying out, without the need for vast quantities of ice. They are manufactured from brushed stainless steel with a food-safe stainless steel interior. The trays, their inserts and the racking are also stainless steel and can be fully removed for cleaning. The OC150 and OC80 take standard 1/1 gastronorm pans. The OC250 can either take front and rear stacked 1/1 pans or 2/1 gastronorm trays for larger fish. A drain is situated at the base of the cabinets which can be connected to an external pipe if required. Castors are fitted to the OC250 and OC150 (and can be factory fitted to the OC80). Insulation is efficient, ozone friendly polystyrene and the refrigerant used is environmentally friendly R600a.

Fresh Fish Cabinets

Details	OC80	OC150	OC250
Height (mm) (inc castors on OC150)	900	1490	1490
Width (mm)	530	530	730
Depth (mm)	700	700	850
Number of Trays (1/1 gastronorm 100mm deep)	3	3	0
Number of Trays (1/1 gastronorm 150mm deep)	1	4	10
Total Tray Capacity (litres)	61	122	180
